(d) how is the performance of PRIs in implementing the Total Sanitation Campaign (TSC) component under NRHM; and

(e) what measurable benchmarks were fixed for TSC and any such benchmarks have been met by PRIs?

THE MINISTER OF HEALTH AND FAMILY WELFARE (DR. ANBUMANI RAMDOSS): (a) to (c) No Sir. No formal assessment has been made as the National Rural Health Mission (NRHM) has been launched in 2005-06. Involvement of Panchayati Raj Institutions [PRIs] is to own and manage health facilities is a core strategy under the National Rural Health Mission. The NRHM provisions for flexible funds for the Panchayats through sanctioning untied fund to sub centres, funds to the Rogi Kalyan Samitties and the Village Health and Sanitation Committees and augmentation of manpower at the grassroot level through ASHA, Additional ANMs at sub centres etc. operating within the framework of PRIs. Besides PRIs are to be fully involved in the preparation of Village/Block and District Health Action Plans.

(d) and (e) Total Sanitation Campaign is not the component of NRHM. However inter sectoral convergence with TSC is envisioned under NRHM. Under the Total Sanitation Campaign, benchmark set for Panchayati Raj Institution (PRIs) is that they should be free from open defecation, all houses should have assess to sanitary latrines, all schools and anganwadi centres in government land should have toilet facility and there should be over all clean environment in the Panchayat area. During 2004-05 and 2005-06, 38 Gram Panchayats and 760 Gram Panchayats respectively have attained these benchmarks. These PRIs have been awarded Nirmal Gram Puraskar (NGP).
